CONTAMINANT TYPE:	Solvents
MEDIA AFFECTED:	Groundwater
CONTACT PERSON:	Ryan Groves at (317) 233-2406
LAST REVISED:	November 2001
SITE PHOTO	
<p>STATUS: In 1987, groundwater contamination was discovered on the southwest side of the City of Elkhart. The United States Environmental Protection Agency conducted a mitigation action that initially installed carbon filtration systems on residential wells. Eventually, nearly 50 residences were hooked up to a municipal water supply. No further remedial actions are warranted and the site is proposed for delisting from the Commissioner's Bulletin.</p>
